AdmitAssist:

no serious parent waits behind a casual one

A triage and reply assistant for school admission inquiries

GOLLAPUDI SIVA NAGA JNANA TEJA · Roll 2025MB26205 · GitHub jnanateja009 · Solo submission

THE PROBLEM TODAY

About 200 inquiries a month

In season, by WhatsApp, voice notes, calls, walk-ins, web form, e-mail (assumed, being counted).

One coordinator, from memory

Reads each one (about 6 minutes, assumed), replies from memory, first come first served.

Same quick reply for all

Even sensitive ones: complaint, fee help, a child's health, custody. Most inquiries are never recorded.

One lost admission =
Rs 12,000 to Rs 30,000 of fees a year.

"I built this school's first website and admission form in college. The form moved inquiries online. It changed nothing about what happens next."

How it works: a person always sends

Who does each step: **Person** **Rules** **AI** **Staff only**

1 Paste
Coordinator pastes the message

→

2 Screen
Rules hide phone numbers and check sensitive words

→

3 Read
AI reads class, timeframe, intent signals, sensitive? Each with the exact quoted words

→

4 Triage
Rules check the quotes, set priority from visible points and a reply-by time

→

5 Draft
AI drafts a reply from the school's approved facts only

Rules check for promises, invented fees, dates, length

→

6 Send
Coordinator edits, approves and presses Send in WhatsApp

The tool cannot send.

Staff only
Sensitive goes to staff, NO draft

Reply-by (working hours)
HIGH 2 h · MEDIUM 8 h · LOW 24 h

Everything school-specific is a setting: classes, seats, fees, keywords, priority points, model.

Where the AI earns its place

Test set: 48 written sample messages (26 English, 22 Hindi/Telugu mixes).
Rules only vs AdmitAssist (recorded AI run, real engine).

Measure	Rules only	AdmitAssist
Sensitive messages sent to staff	4 of 10	10 of 10
Class read correctly	33 of 40	40 of 40
Priority matches label	27 of 30	30 of 30
HIGH inquiries shown as LOW	0	0
Drafts passing all checks	n/a	30 of 30
AI cost per inquiry	Rs 0	about Rs 0.32

WHAT RULES MISSED

Rules missed every sensitive message written indirectly or in Telugu/Hindi script, including a custody case and a child with a speech delay. Both would have got a template draft.

51 of 51
rule and red-team tests pass (19 of 19 bad drafts blocked)

Honest read
Written samples and a stand-in model, so these numbers are probably too good. 10 of 10 only proves recall above 72%. Gate A: live model on 100 real messages + 75 sensitive ones, 0 misses allowed (75 with no miss proves recall above 95%).

Unit economics and the competition

One school, one busy month (200 inquiries)

Price	**Rs 1,499**
AI calls	Rs 72
Support time	Rs 250
Payment fee	Rs 30
Storage	Rs 20
Cost to serve	**Rs 372**
Contribution	**Rs 1,127 (75%)**

What schools use today

Option	Price	Gap
Paper register + WhatsApp app	Free	No priority, no checks, no record
Free AI chat	Free	Invents fees and dates, no queue, parents' numbers in personal accounts
WhatsApp platforms (AiSensy, Interakt, Wati)	Rs 1,350 to Rs 4,899 a month + message fees	Bots reply on their own; needs an API number
Admission CRMs / school ERPs (ExtraaEdge, Teachmint)	Quote on request	Built for larger institutions
AdmitAssist	Rs 1,499 season month, Rs 299 quiet month	About 1 hour of the school's time to set up; a person always sends

Competitor prices: public pages, Oct 2026.

Quiet months Rs 299. Year: Rs 10,788 per school. 1 extra admission a year pays for it.

Risk is my support time, not the AI bill: margin is 58% at 1 h of support per school per month and -8% at 3 h.

Win + set up a school: about Rs 6,000 of time, paid back in about 5 busy months. 3 schools cover the server; 78 pay me Rs 50,000/month.

Recommendation: pilot

My plan to first money

P0 Ground truth
2–15 Nov 2026

100 real labelled inquiries

P1 Pilot build
16 Nov–6 Dec

Gate A

P2 Shadow run
7–20 Dec

Gate B

P3 Assisted pilot
21 Dec 2026–28 Feb 2027

Go/no-go 28 Feb

P4 Sell
From 18 Jan

10 demos
3 paying schools
first invoice 1 Mar 2027

V2 · Apr–Sep 2027 · 25 schools
WhatsApp inbox, Telugu/Hindi replies, follow-ups, self-serve setup, DPDP consent steps by 30 Apr 2027

V3 · Oct 2027–Mar 2028 · 100 schools
Admission funnel report, outcome-linked price trial, plug into a larger platform

My ask

School owner's consent + 100 past inquiries by 15 Nov 2026

2 hours a week of the coordinator's time

About Rs 13,000 of my own money to reach the first invoice

If AdmitAssist saves one admission a year, it has paid for itself.
